The book is a comprehensive guide to the various aspects of sustainable agriculture. It covers the latest cutting edge technologies applicable to each component of the integrated farming system and the science behind an agro ecological approach. The book discusses at length the various aspects of sustainable agriculture, including the use of modern technologies, new concepts and innovations, and the importance of environmental aspects. It also discusses the various challenges faced by farmers in developing countries and offers practical solutions to these problems. The book is a valuable resource for anyone interested in sustainable agriculture.

in most developing countries agriculture has grown from merely an art to a science but it does not yet maximize its business potential in these countries subsistence farming dominates and farmers face the increasing impact of climate change and natural disasters an integrated farming system if model yields minimum risk and maximum environmental benefit the latest cutting edge technologies applicable to each component of ifs and the science behind an agro ecological approach are discussed at length in this book which takes a holistic approach towards sustainable agricultural production technologies that result in maximum profit for the farming community also it considers practices that care for natural resource bases and leave behind minimal environmental footprints to keep prepared for climate change and natural disasters appropriate contingency measures to tackle these unwanted situations are detailed the book offers comprehensive coverage of the most essential topics including modern technologies new concepts and innovations such as 3d farming integrated system of rice intensification isri hydroponics rooftop farming and water budgeting the use of it for supporting ifs and environmental aspects related to greenhouse gas ghg emission information on organic farming covering all its aspects present situation market related issues and future options in situ input generation procedures that are integral to recycling and their effective reuse region specific ifs models based on soil climate and farmers requirements for different agroclimatic situations ifs management aspects including water harvesting conservation increased productivity and drainage latest information on the socio economic factors impacts government orientations policy framework towards agriculture and environmental aspects and the future road map to make ifs a success this book will serve as a handy reference for academics researchers students progressive farmers and policymakers aiming to make agriculture more resilient sustainable and eco friendly

getting the right diagnosis is a key aspect of health care it provides an explanation of a patient s health problem and informs subsequent health care decisions the diagnostic process is a complex collaborative activity that involves clinical reasoning and information gathering to determine a patient s health problem according to improving diagnosis in health care diagnostic errors inaccurate or delayed diagnoses persist throughout all settings of care and continue to harm an unacceptable number of patients it is likely that most people will experience at least one diagnostic error in their lifetime sometimes with devastating consequences diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment providing unnecessary or harmful treatment or resulting in psychological or financial repercussions the committee concluded that improving the diagnostic process is not only possible but also represents a moral professional and public health imperative improving diagnosis in health care a continuation of the landmark

institute of medicine reports to err is human 2000 and crossing the quality chasm 2001 finds that diagnosis and in particular the occurrence of diagnostic errors has been largely unappreciated in efforts to improve the quality and safety of health care without a dedicated focus on improving diagnosis diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity just as the diagnostic process is a collaborative activity improving diagnosis will require collaboration and a widespread commitment to change among health care professionals health care organizations patients and their families researchers and policy makers the recommendations of improving diagnosis in health care contribute to the growing momentum for change in this crucial area of health care quality and safety

both europe and the us have now dampened the shrillness of the invective hurled against each other over the last years but the underlying differences have not been resolved the two sides drift apart in their views on what internal politics should achieve as well as in their vision of the global order they would like to see established the economies of both europe and the us are highly developed and densely interwoven their societies are post industrial many social and economic trends converge similar too are the challenges to maintain security against threats emanating from other parts of the world divergences thus do not originate from conflicting material interests they arise from different perceptions of the nature and of threats from the outside world from how the two societies wish to define themselves through their internal and external policies the search for a distinct european or american identity fuels this discord therefore appeals to common merely material interests will not obliterate it the contributions to this book come from altogether twelve authors each of them addressing the issues from the perspective of his or her own discipline the book aims to reach not just academia but also beyond to those that are involved in actual international decision making

the development and application of bioinformatics tools to basic and translational cancer research is in fact a rapidly expanding field that deserves a timely review therefore a publication of this type is needed the editors have done an excellent job in recruiting well established scientists to author the various chapters of the book dieter naf jackson laboratory usa cancer bioinformatics is now emerging as a new interdisciplinary field which is facilitating an unprecedented synthesis of knowledge arising from the life and clinical sciences this groundbreaking title provides a comprehensive and up to date account of the enormous range of bioinformatics for cancer therapy development from the laboratory to clinical trials it functions as a guide to integrated data exploitation and synergistic knowledge discovery and support the consolidation of the interdisciplinary research community involved
