Answer: The primary purpose of a WBS is to break down project deliverables into smaller, more manageable components, facilitating better planning, estimation, and control. It helps in defining the scope clearly and provides a framework for assigning responsibilities. It ensures all deliverables are accounted for and helps in avoiding scope creep. --- Schedule Management Q2: Which technique is commonly used to estimate the duration of project activities? Explanation: PERT uses three estimates to calculate an expected activity duration, considering uncertainty, providing a more realistic schedule estimate. Q3: What is the critical path in project scheduling? Answer: The critical path is the longest sequence of activities in a project schedule that determines the shortest possible project duration. Any delay in activities on this path will directly impact the project's finish date.
